

FORESTRY TRAILER

RF9000X

COSTA

THE STRENGTH YOU NEED, WHERE YOU NEED IT

From our vast experience with forestry professionals, we know well their main need: strength.

From a forestry trailer one expects not only that it transports wood, but that it overcomes the more diverse obstacles, goes up and down in very steep and irregular terrains in a controlled fashion, and that it accomplishes all this with the maximum load which the necessity of productivity requires.

Our trailers were developed to fulfil all these requirements.

With geared transmission to guarantee the required strength and reliability, and independent motors to overcome the hardest terrains, they get the wood out of where you didn't think it was possible to.

These are the reasons why the COSTA trailers are a step beyond in the wood transporting world.

FORESTRY TRAILER

RF9000X

EQUIPMENT

Standard

Geared transmission
Steerable drawbar
Hydraulic brakes
Front grid
Electric installation

Opcional

Hydraulic extension of the front grid
Hydraulic descent control
Parking brake
Hydraulic group (tank, pump, etc.)
Winch
Crane application

TECHNICAL SPECIFICATIONS

Capacity	9 000	kg
Tare (without crane)	2 480	kg
Transport dimensions		
length (without crane)	4 010	mm
length (with crane)	3 600	mm
width	1 650 / 1 750	mm
Maximum dimensions		
length	5 500	mm
width	1 900 / 2 000	mm
Traction strength	3.5	
Traction	2 hydraulic motors	
Transmission	oil bathed gears	
Tyres	400/60-15.5"	
Axels	2 (tandem)	
Brakes	multi-disc
